Entry list will be updated as often as possible at www.chilibowl.com. Any changes to listed information must be made before January 1, 2026.

Right Rear must be a Hoosier SP3 Left Rear must be a Hoosier D12 (74, 76, 77, 78, or 80).

In compliance with our contract with the Tulsa Fairgrounds all participants MUST run fuel purchased from 405 Performance Products at the event.

# **\$20,00**

TO WIN Saturday Night Lap Money! 1st (\$150/Lap), 2nd (\$50/Lap)

## **Expo Car Rules Posted At ChiliBowl.com/about**

- Right and Left side cockpit body panels may be a maximum of thirty-six (36) inches high as measured from the bottom frame tube at rear motor plate and projected rearward twenty-three (23) inches with a minimum eight (8) inches vertical opening from the afore mentioned point forward, including side visor 2. Side visors on roll cage will be limited to eight (8) inches tall.
- 3. Panels attached to nerf bars will not be permitted.
- 4.All paneling must not extend past edge of frame rails more than thickness of material.
- 5. One (1") inch turnout allowed on all body and sail panel edges, except sun visor.
- 6. The number of allowable wheels is restricted to two (2) front wheels and two (2) rear wheels on each car. Use of anything other than a wheel and tire assembly is prohibited.
- 7. Minimum 5/16" flanged steel bolt and an approved ASCS or WoO fastening (nut assembly) system must be used on all Wheel Covers.
- 8. Teams running multiple cars with identical numbers, a letter is required on each vehicle. Letters must be a minimum of 7 inches tall and must clearly accompany the car's number on the tail tank. The number on the nose piece must also have the corresponding letter. Each car letter must be of a different contrasting color. Car number and letter combination must be legible from the Scorer's Stand. We have people hand-scoring because sometimes the transponder system goes down, they fall off the car, or just stop working. We need to be able to read all car numbers so you are not scored incorrectly and also to speed up time under caution. It also helps our infield crew to move cars around when a RACEceiver malfunctions. Contrast is important. Black on black with a hint of grey is not readable when a car is in motion, especially from a distance.
- 9. Right Rear must be a Hoosier SP3. Left Rear must be a Hoosier D12 (74, 76, 77, 78, or 80).
- 10. Midget Chassis specs are posted to www.chilibowl.com and will be enforced. Website Supersedes All Printed Material.

### **!! ATTENTION !!**

## In compliance with our contract with the Tulsa Fairgrounds, all participants MUST run fuel purchased from 405 Performance Products at the event.

This fuel, containing 10% ethanol, will improve the air quality inside the building. Fuel will be checked in staging area and any infractions will result in disqualification of car and driver. A colored dve will be added to the fuel for the purpose of enforcing the rule and fuel will be spot checked during the week. There will be no exceptions and this will be monitored by the Tulsa Fairgrounds. NO outside fuel will be permitted. Any trailers found to be transporting fuel into the building will be escorted from the premises by the Tulsa Fire Marshall.

\*\*\*All teams must have a working Fire Extinguisher in their trailer\*\*

We will once again make every effort to get each and every team parked inside the SageNet Center. As always, the chances of successfully accomplishing this feat are greatly enhanced with your assistance and cooperation in this matter. Teaming with others and pitting multiple cars out of one trailer is encouraged. Single-car teams will be permitted a maximum trailer length of 24 feet. Single-car teams with trailers exceeding this length will either need to team with another car or be required to unload all necessary equipment and park the trailer outside.

SageNet Center • Tulsa Fairgrounds
